Walk Kansas Get Fit Tips

Smart Choices Help Prevent Diabetes and Other Diseases When you get more physical activity you reduce your risk of getting heart disease, high blood pressure, osteoporosis and cancer. Adults need 30 minutes of moderate activity (such as walking) most days of the week.

Eat Smart: Eat the Rainbow. Eating lots of colorful fruits and vegetables is an easy way to get the vitamins and minerals you need. Toss some

RED dried cranberries into your salad. Enjoy **ORANGE** sweet potatoes with a sprinkle of cinnamon. Dip pieces of **YELLOW** pineapple into low-fat yogurt. Add steamed **GREEN** broccoli to your favorite pasta dish. Throw some **BLUE**berries on top of your oatmeal. Sample some **PURPLE** cabbage for a tasty change. **Enjoy More FRUITS and VEGGIES!**

Love Your Family: Eat Meals Together Enjoying more family meals adds up to better nutrition, stronger family bonds and children who are less likely to participate in risky behaviors. Be flexible with meal schedules but keep family mealtime and create memories that last a lifetime.

Draw On Your Plate At lunch and dinner, imagine drawing lines on your plate to make four equal sections. Fill two sections with fruits and vegetables. Fill a section with whole grain foods such as brown rice or whole grain pasta. Fill a section with lean protein such as grilled chicken, beef, fish or black beans. **EAT SMART** by picking right size portions to make a healthy meal.
